

Every morning on my way to work, I tune in the Instant traffic and weather for Detroit. I know the best way to drive to work, avoiding construction, traffic accidents etc., before I even leave my driveway. I am also able to finally listen to commercial free music and or talk channels. What a stress reliever that is. Prior to XM Radio I was usually frustrated during my commute trying to find music and not listen to constant commercials. The only time I was not frustrated was when the radio was off. I paid for the XM equipment and pay a monthly fee for the service. I think if XM can provide a channel and I am willing to pay for it, then it should be delivered.
